SUMMARY

Senior Full Stack Developer and Indie Game Developer with experience across web, mobile, cloud, and Unity-based game development. Proven ability to ship complete products end-to-end, including frontend, backend, infrastructure, localization, and publishing. Strong background in Angular, React, TypeScript, AWS, and C#, with public trust and top secret clearance experience.

AI WORKFLOW

Prompt Engineering · AI-Assisted Development · LLM Workflow Optimization · Cursor · Claude · OpenAI API Integration · Test-Driven AI Iteration · Automation of Documentation & Code Generation

CORE SKILLS

Angular · React · TypeScript · JavaScript · Unity (C#) · AWS · MongoDB · PostgreSQL · Node.js · Next.js · Docker · Terraform · Python · Selenium · Jasmine · Android · REST APIs · Localization · Agile

LANGUAGES

English (Native) · Mandarin Chinese (Fluent, HSK Certificate)

PROFESSIONAL EXPERIENCE

Founder & Lead Game Developer – Kanmai LLC (Mainu, Steam & Android)

Jan 2024 – Present

- Designed, developed, and published a complete commercial game using Unity and C#.
- Built combat systems, AI, progression, save/load, UI, and particle systems.
- Created 100% original hand-drawn art, animations, and environments.
- Implemented an 8-language localization system with dynamic fonts and JSON pipelines.
- Managed Steamworks setup, cloud saves, achievements, publishing, and marketing assets.

Angular Developer – Alaska Northstar (FEMA Contractor)

Jun 2024 – Apr 2025

- Developed accessible UI components for FloodSmart.gov using Angular.
- Built responsive, WCAG-compliant interfaces aligned with federal design standards.
- Wrote unit tests with Jasmine and participated in Agile sprint cycles.

Full Stack Developer – BCT Partners

Jul 2022 – Oct 2023

- Led development of a nonprofit analytics dashboard using MERN stack and Next.js.
- Deployed scalable infrastructure with AWS EC2, Elastic Beanstalk, and Terraform.
- Implemented SEO optimization, security practices, and database integrations.

AI / QA Engineer – Meetkai

Jan 2020 – Jun 2022

- Built NLP tooling using Python and PyTorch.
- Automated QA workflows with Selenium WebDriver for AI systems.

Full Stack Developer – Edvoyage

Jan 2018 – Nov 2019

- Developed a live streaming platform and Android app using React and Nest.js.
- Deployed cloud infrastructure on AWS with scalability and reliability focus.

EDUCATION

University of Pittsburgh – M.S. Public Administration

Cal Poly Humboldt – B.A. International Business
